

APPENDIX I: Maps of climate threat risk factors to GDEs in Nevada

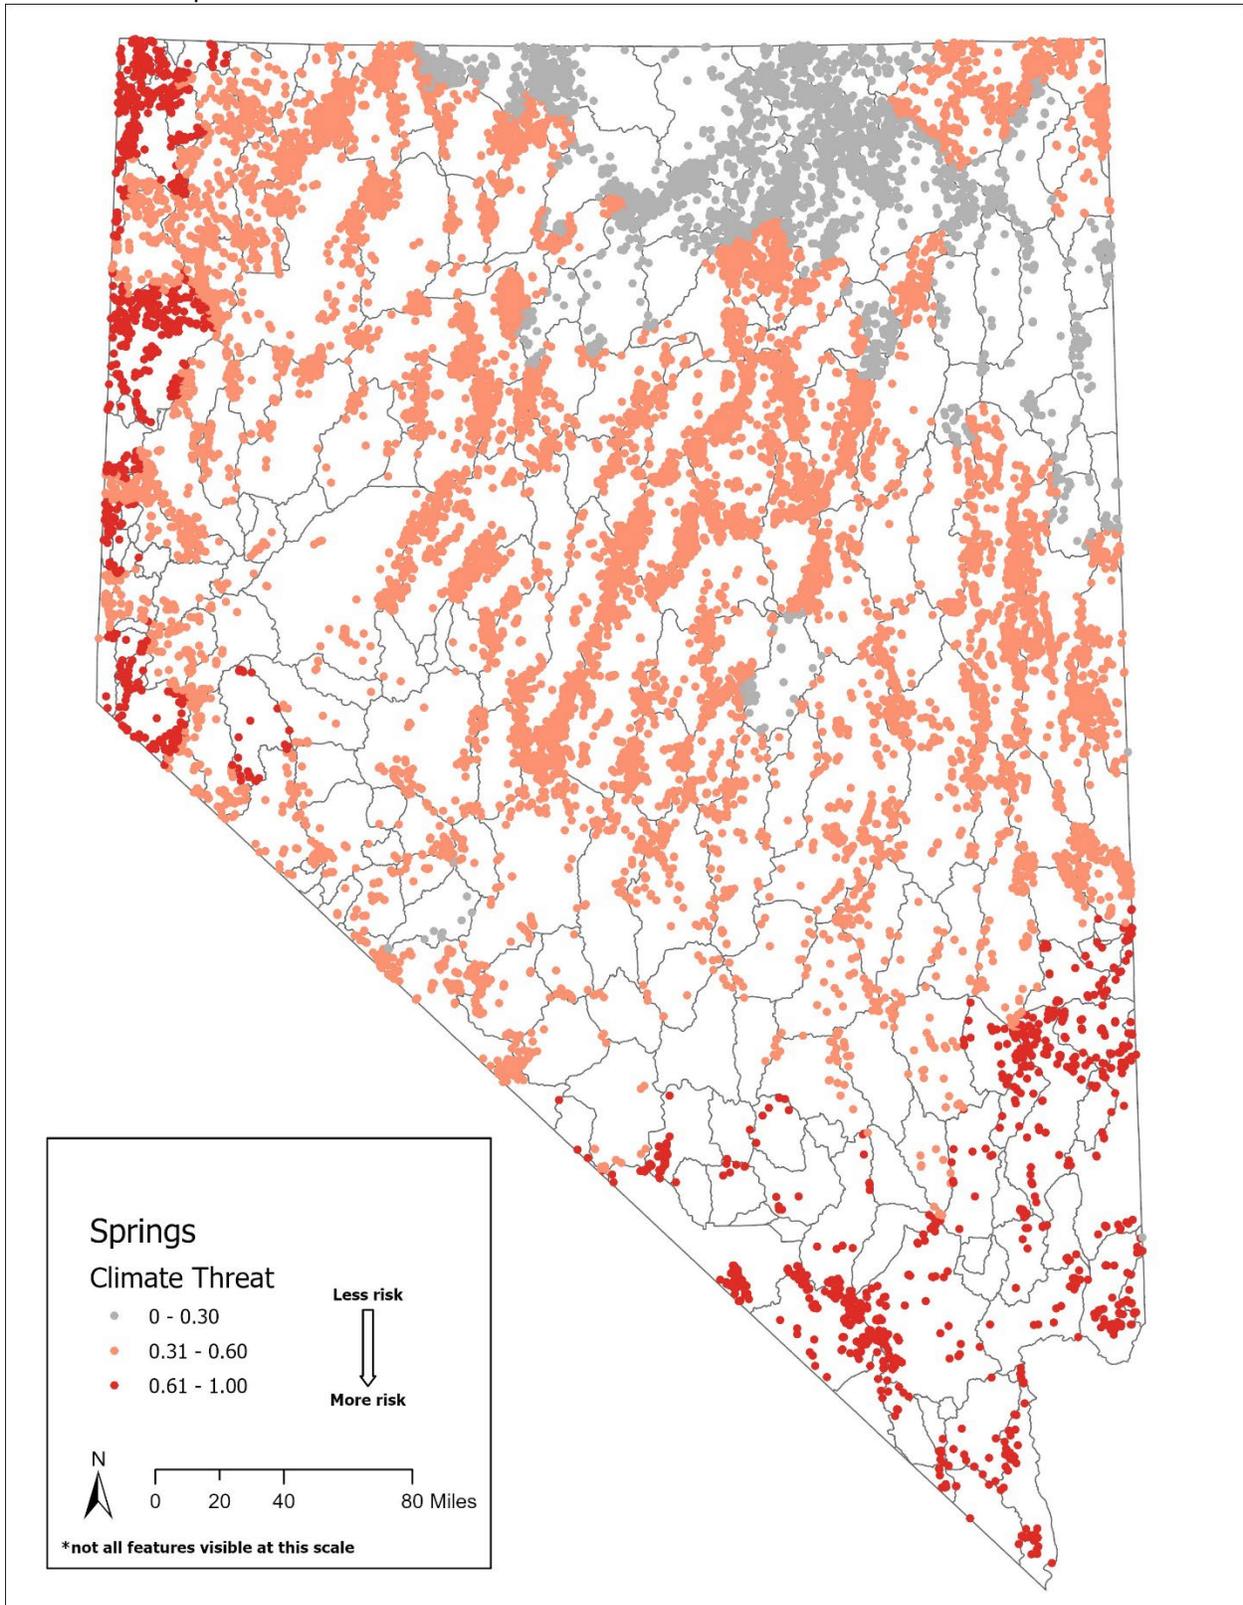

Figure I-1. Climate threat risk factor values for GDE springs in Nevada. Ratings are from 0.00 (negligible risk) to 1.00 (high risk).

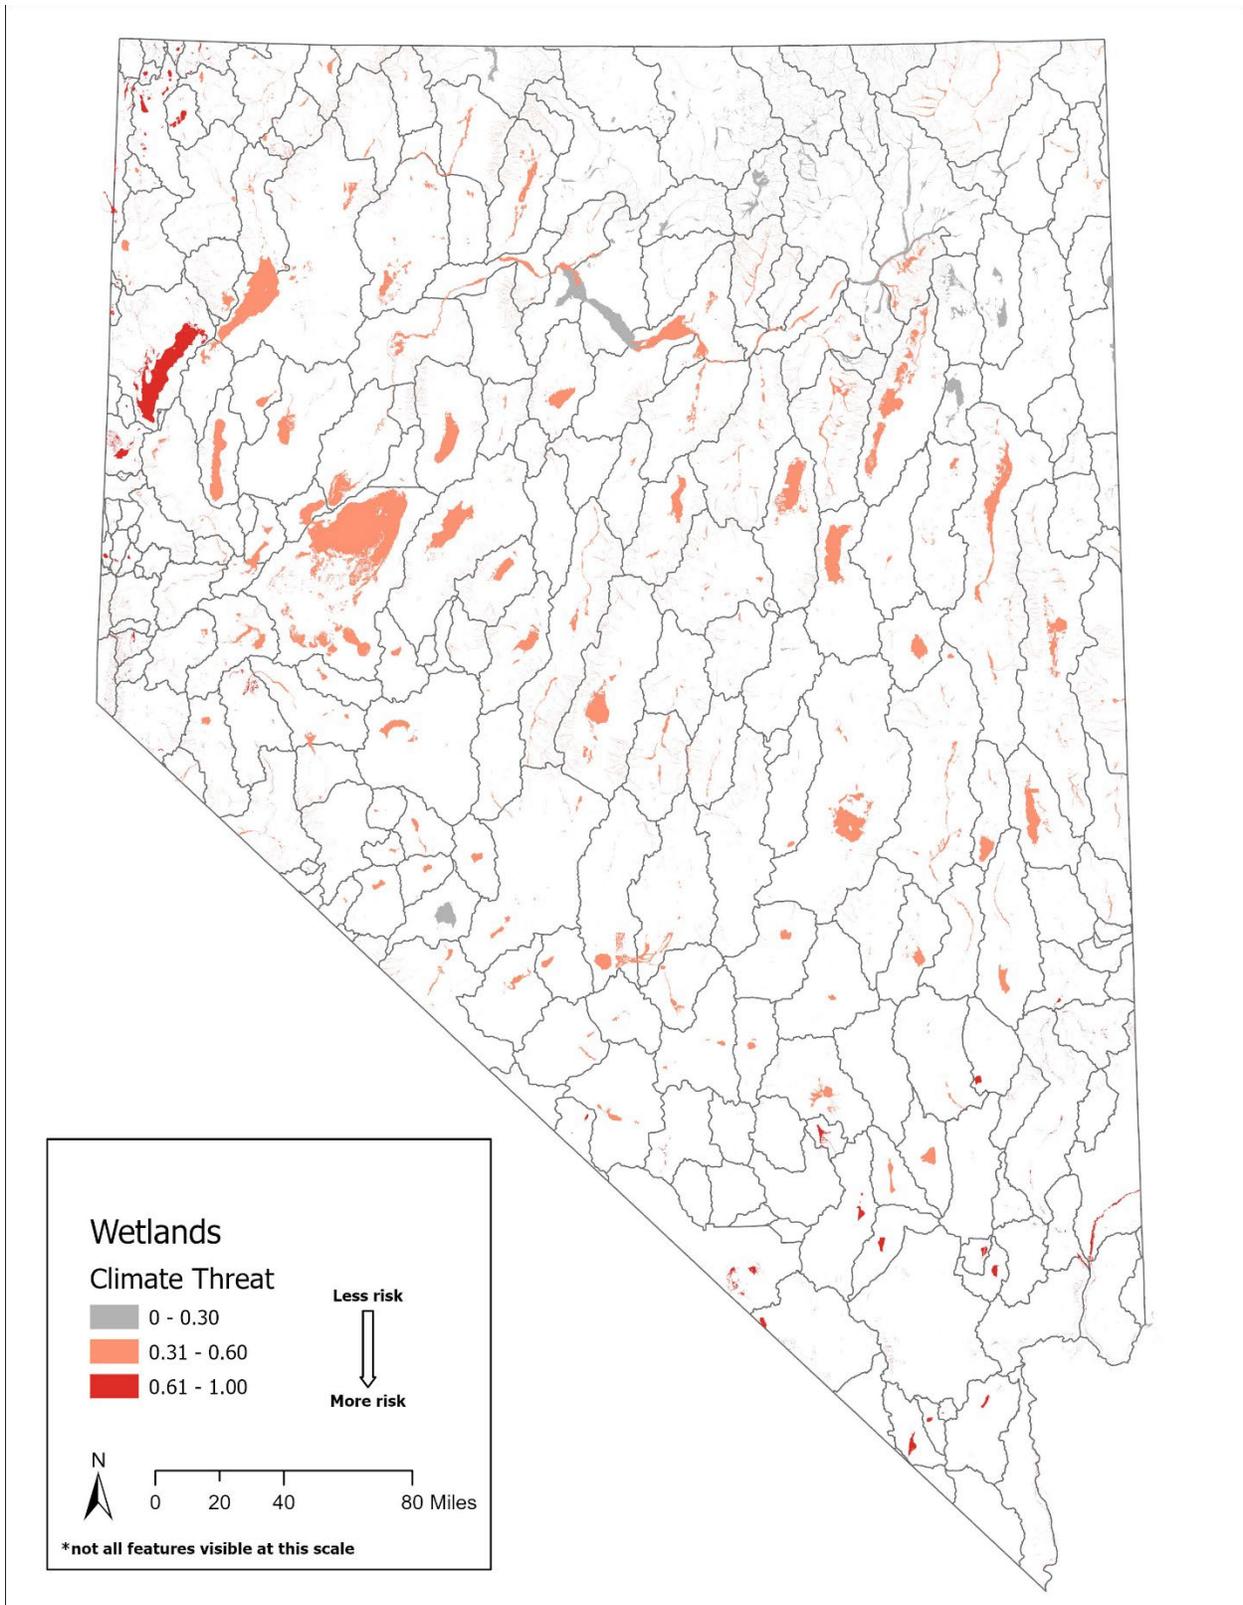

Figure I-2. Climate threat risk factor values to GDE wetlands in Nevada. Ratings are from 0.00 (negligible risk) to 1.00 (high risk).

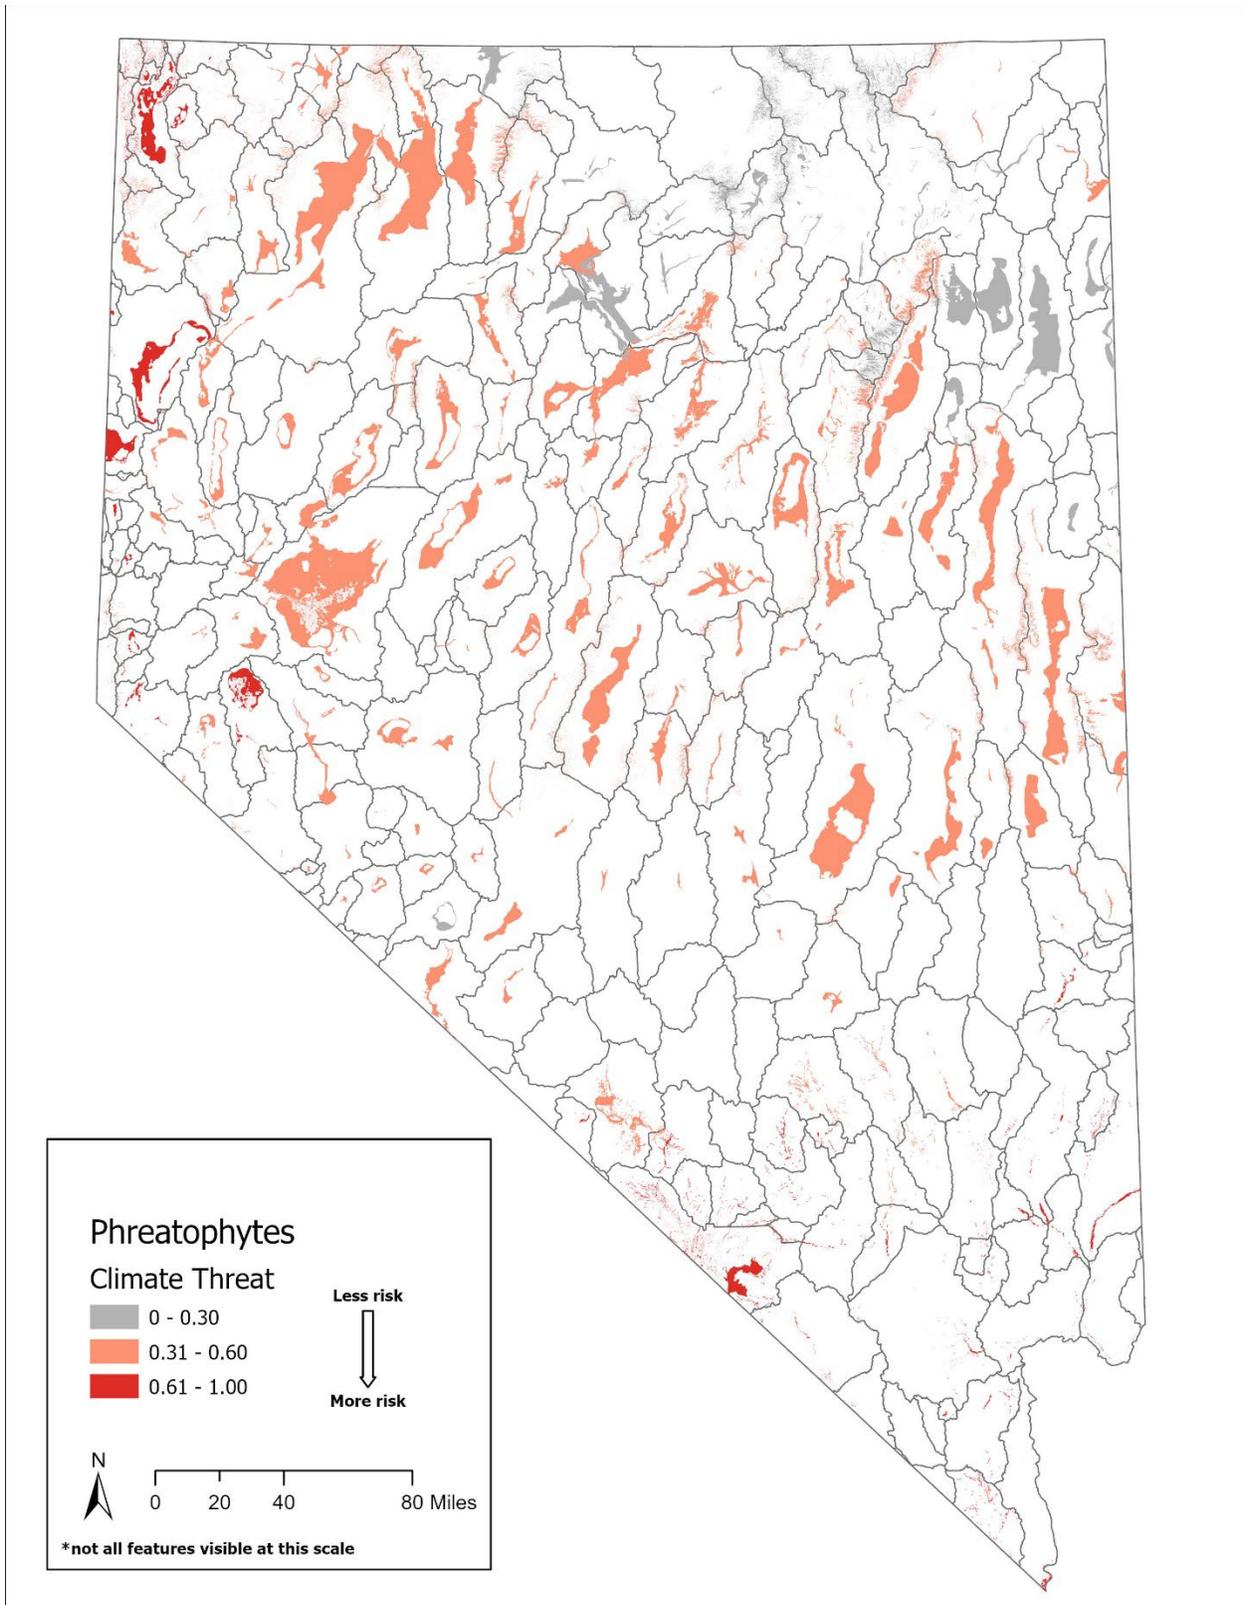

Figure I-3. Climate threat risk factor values to GDE phreatophyte communities in Nevada. Ratings are from 0.00 (negligible risk) to 1.00 (high risk).

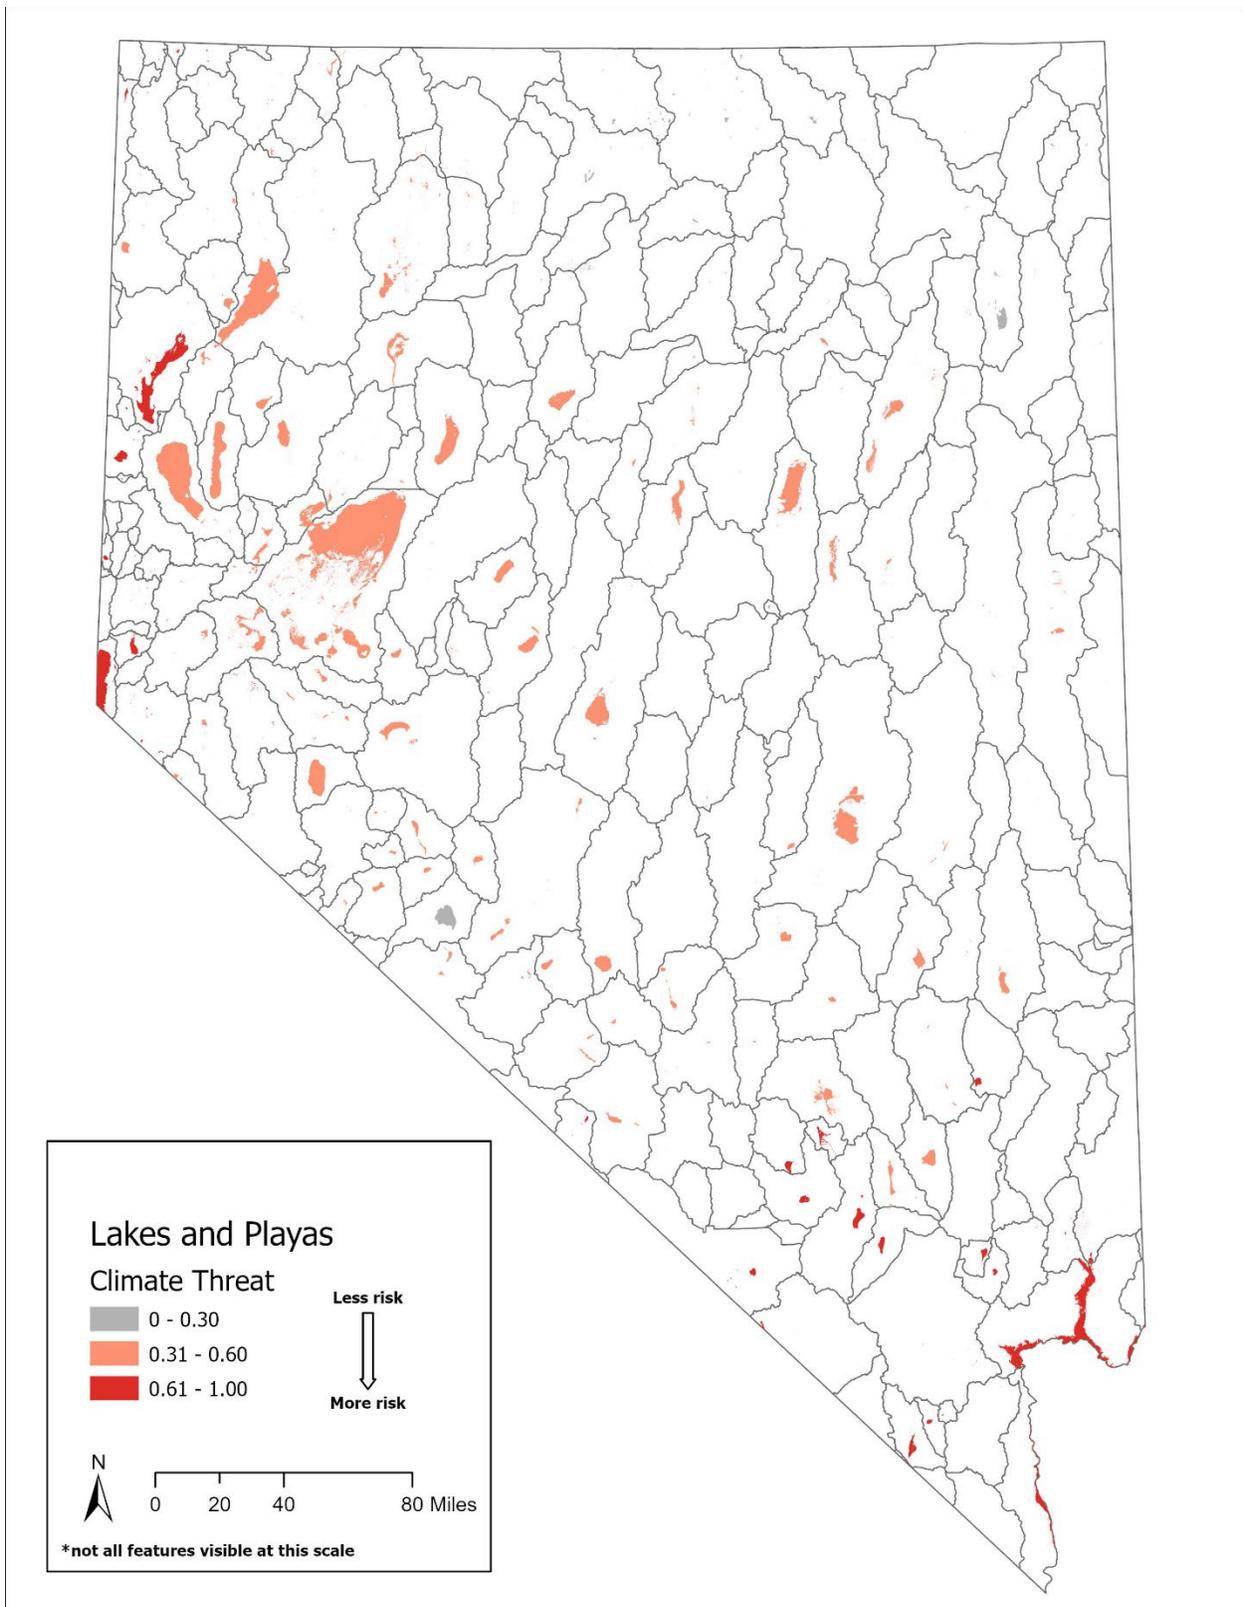

Figure I-4. Climate threat risk factor values to GDE lakes and playas in Nevada. Ratings are from 0.00 (negligible risk) to 1.00 (high risk).

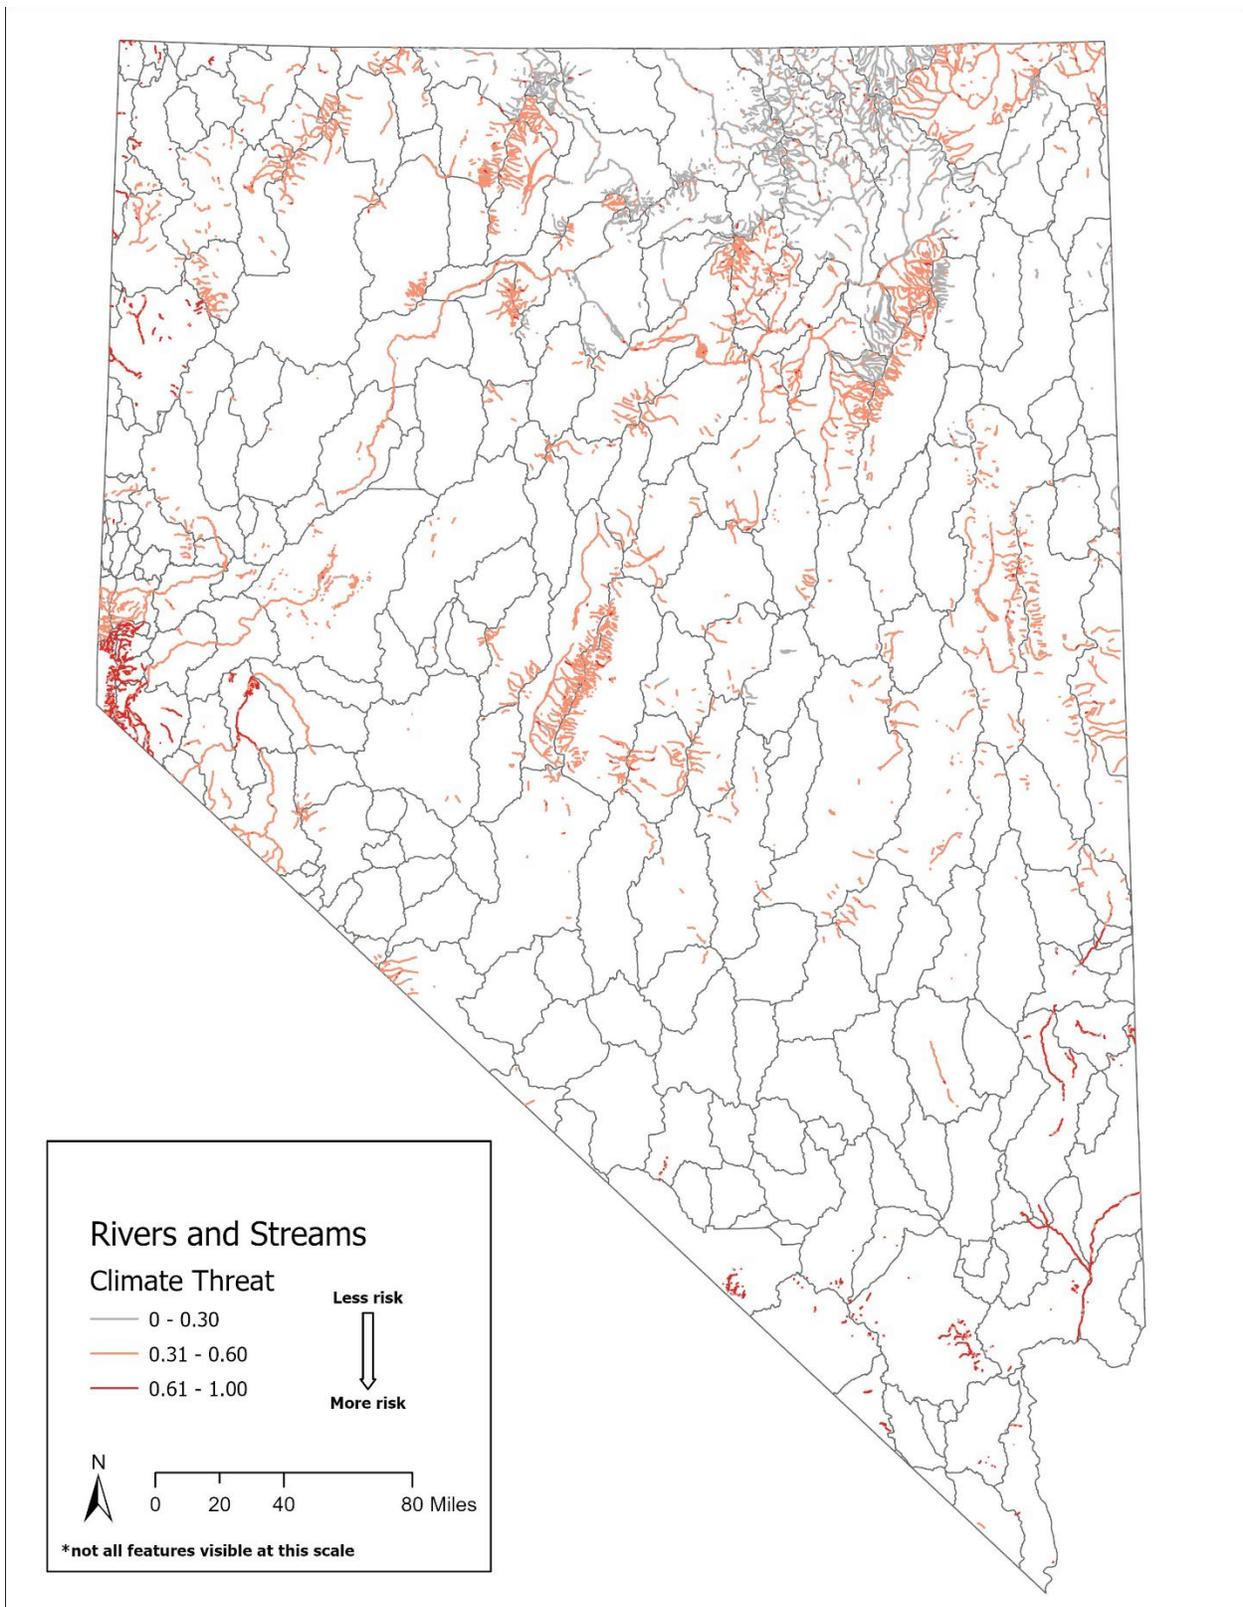

Figure I-5. Climate threat risk factor values to GDE rivers and streams in Nevada. Ratings are from 0.00 (negligible risk) to 1.00 (high risk).
