FLN Networker No. 287: September 18, 2019

The FLN Networker is a publication of the Fire Learning Network—a partnership of the USDA Forest Service, agencies of the Department of the Interior and The Nature Conservancy—intended to foster communication within the network and among its friends. Submit comments, information to share, and subscription requests to Liz Rank.

For more about the FLN, visit www.conservationgateway.org/fln or contact Marek Smith.

News from the Field

California: Bill Tripp (btripp@karuk.us) and Kari Norgaard were on Jefferson Public Radio last week for the interview "Karuk Tribe Unveils Climate Adaptation Plan."

California: Elizabeth Azzuz was a panelist at screenings of the film "Wilder Than Wild: Fire, Forests and the Future" in San Rafael and Vallejo last week. These screenings were part of a broad outreach effort that the filmmakers are encouraging (for example with the take action page on the film's website).

California: In the FireScape Mendocino landscape last week, fire and conservation leads from the Round Valley Indian Tribes and other members of the Covelo FireScape Subgroup toured potential prescribed fire projects along Etsel Ridge on the Mendocino National Forest, with conversations centering on how to best incorporate tribal knowledge to successfully achieve multiple project goals. For more, check out their latest blog post or contact Don Amador (damador@cwo.com).

Colorado: The San Juan TREX is currently underway across the San Juan National Forest. Both papers in Pagosa Springs ran the <u>outreach</u> piece TREX organizers provided, which gives a good overview of the event. With assistance from the TREX team and others, including the Blue Ridge and Tatanka hotshots, the San Juan NF completed 7,175 acres of prescribed over the course of a week; the TREX team also assisted the Bureau of Land Management on 600 acres of burning. Check out the TREX Facebook page for updates and photos.

New Mexico: Last weekend, several members of the Greater Santa Fe Fireshed Coalition—the City of Santa Fe Fire Department and Water Division, Forest Stewards Guild, Pueblo of Tesuque and Santa Fe National Forest—hosted a public tour of the site of a May prescribed burn. The 500-acre Pacheco Canyon burn was a first-entry treatment within the 2,400-acre Pacheco Canyon Forest Resilience Project. Rather than a formal presentation, the format of the tour was about giving people an opportunity to walk and talk with those who implemented the burn, including the burn boss, fire management officer and others. The 21 people participating in the tour had a wide range of interests and questions, from "How exactly do you burn?" to specific queries about the ignition techniques used, soil effects from the burn treatment and the monitoring plan for soils, the residual number of trees in the treatment area, post-burn vegetation response, and air quality monitoring results during burn activity." For more, contact Porfirio Chavarria (pnchavarria@santafenm.gov).

North Carolina: About 35 partners in the Central Escarpment landscape met last month at Lake James State Park where they shared updates on recent work, and looked ahead to projects ranging from FAC work days to the coming burn season. They also shared a couple of big 2020 save-the-dates, for the Southern Blue Ridge FLN regional workshop (May 19-21) and the next SBR TREX (October 26-November 6). For more, contact Adam Warwick (awarwick@tnc.org).

Virginia: FLN partners in the **Heart of the Appalachians landscape** conducted a **long-awaited late growing season burn** on the George Washington NF in an area known for its Special Biological Areas and shortleaf pine. Managers experimented with tactics in response to atypical conditions and

documented fire behavior and lessons learned for burning outside the usual burn window. Burning late in the growing season was chosen to reduce high duff layers in the pines, thin overstory trees and reduce high shrub densities to create good conditions for shortleaf pine regeneration. Managers were pleased with the immediate results and are eager to observe changes over the next year. For more, contact **Butch Shaw** (<u>ldshaw@fs.fed.us</u>).

Central Appalachians: More than 80 partners gathered in western Maryland last week for the annual regional workshop of the Central Appalachians FLN. After a keynote on fire history research, presentations on communications and social perceptions allowed participants to consider how to intersect social science with fire science to best build trust and public support for fire management. Later, three state perspectives on burn operations and objectives across three agencies gave way to discussions in monitoring for successes specific to desired outcomes. On the second day, participants travelled to Savage River State Forest, where keynote speaker Marc Abrams took a 400-year look at fire and oaks history, and a stop at Dans Mountain WMA allowed for more discussion on operations and bringing fire back to the mountains. For more, contact Laurel Schablein (Ischablein@tnc.org).

Feedback Requested: NWCG Position Descriptions

NWCG Position Descriptions: Several new incident position descriptions are **available for review** during an initial **comment period**; these include firing boss (<u>FIRB</u>) and prescribed fire burn boss positions (<u>RXB1, RXB2</u>).

Resources: Emergency Management & Resilience / FAC Tips / Go-No Go Form

Emergency Management & Resilience: Public Safety Canada recently released an "**Emergency Management Strategy** for Canada: Toward a Resilient 2030" <u>guide</u>. Of particular interest may be the section "What Do Resilient Communities Look Like?" which notes two important **aspects of resilience**, first that it refers to "the **dynamic quality of a system**, the whole system, rather than the sum of its individual parts. Second, resilience is a **strengths-based** construct...."

FAC Tips: In a recent <u>post</u>, Fire Adapted New Mexico shares some good suggestions for improving the **fire-readiness** of a neighborhood, house and yard—and encourages readers to use the tips to **start a conversation** with friends and neighbors. (They even provide snack suggestions.)

Go-No Go Form: If you are documenting aspects of burns using a tablets or smartphone, the **electronic version** a <u>go/no go list</u> in the TNC fire manual may be useful. You can fill in the blanks, tick boxes and sign the pdf form.

Articles & Reports: Nudge / Fire Refugia / Harvest Targets & WUI / JFSP

Nudge: The authors of the <u>article</u> "**Phone-Call Reminders** Narrow the Intention-Action Gap by Increasing Follow-Through for a Residential Tree Giveaway Program" found that reminding people who had signed up for an event by phone (in addition to their standard mail and email reminders) **increased participation** by 16 percent. (The program's "theory of change" diagram and **study design** laid out in the article also looks like they **could be adapted** to test similar interventions.)

Fire Refugia: The authors of the <u>article</u> "Contributions of Fire Refugia to Resilient **Ponderosa Pine** and Dry Mixed-Conifer Forest Landscapes" developed a spatially explicit landscape simulation **model** that showed a strong relationship between refugia and regeneration, and "the disproportionate importance of **small**, **isolated islands** of surviving trees."

Harvest Targets & WUI: The <u>article</u> "Tradeoffs Between U.S. National Forest Harvest Targets and Fuel Management to Reduce Wildfire Transmission to the Wildland Urban Interface" explores the tension between these two goals, and identifies "specific planning areas and national forests where joint production of two restoration objectives can be efficiently attained."

JFSP: A <u>report</u> out this summer highlights "**20 years** of Innovation and Transformative Contributions to the Wildland Fire Community" from the **Joint Fire Science Program**.

For Fun: Mother & Son

Mother & Son: Last week's **StoryCorps** <u>episode</u> on NPR had an interview with a mother and son who once served on the same fire crew.

Jobs: Burn Crew / Forestry Aids / Fire Interns / Longleaf Coordinator

As-Needed Burn Crew: The Nature Conservancy is filling crew member and lead positions for its Southern Blue Ridge As-Needed Burn Crew. Based in North Carolina, the crew will add critical capacity on FLN partner burns. Details are on the TNC careers site (crew member, position number 47967; crew lead, position number 47964); applications are due by September 20. (As always, current TNC employees should apply through PeopleSoft (crew member; crew lead).)

Forestry Aids: The **Chattahoochee-Oconee National Forests** are hiring forestry aids (**seasonal fire positions**) on four ranger districts in the Georgia Blue Ridge region for duties that may include fire prevention, patrol, detection or prescribed burning. Details are on usajobs.gov (<u>20-TEMPF1-R8-3867-3DT-AM</u>); applications are due by **September 30**.

Fire Interns: The Student Conservation Association is partnering with the Forest Service Southern Region to offer paid **Integrated Fire and Recreation Internships** for those age 18-30 with at least an associate's degree. Details are on the SCA website; apply by **October 11** for the January-April 2020 session.

Longleaf Coordinator: The **Texas Longleaf Implementation Team** is seeking an implementation team coordinator; details are in the position announcement.

Webinars

September 26	Remap 2016:	: New LANDFIRI	E Products for the	Southwestern I	United States

10:00 Pacific / 11:00 Mountain / noon Central / 1:00 Eastern Details are on the Conservation Biology Institute website.

Register: https://attendee.gotowebinar.com/register/2059595684534269708

October 17 2019 Hot Topics

new listing 9:00 Pacific / 10:00 Mountain / 11:00 Central / noon Eastern

The NWCG Advanced Fire Environment Learning Unit is hosting this webinar with presentations covering a Predictive Services tools comparison, an Alaska fire behavior case study, and information about smoke tools.

Pre-register: https://register.gotowebinar.com/register/1202906804225399820

October 17 Preparing for Wildfires with Firescaping: A Master Gardener Training new listing Designed to Help Protect Southeastern U.S. Communities from Wildfire

10:00 Pacific / 11:00 Mountain / noon Central / 1:00 Eastern

The University of Georgia, Southern Fire Exchange and University of Florida are hosting this webinar that will introduce participants to the day-long Master Gardener training and the online tools that support it

training and the online tools that support it.

Information: https://ufl.zoom.us/webinar/register/WN DCeZJZqWSwyr0uzt7mWHbg

November 19 new listing

Rivercane: A Culturally & Ecologically Significant Plant in the Appalachians

10:00 Pacific / 11:00 Mountain / noon Central / 1:00 Eastern (1.5 hours)

David Cozzo will introduce the cultural and ecological importance of rivercane and Adam Griffith will speak on restoration projects in western North Carolina in the

Southern Blue Ridge FLN webinar.

Details: http://www.conservationgateway.org/ConservationPractices/

FireLandscapes/FireLearningNetwork/NetworkProducts/Pages/SBR-webinar.aspx

Network Workshops & Field Tours

November 4-8 Annual FLN Leaders-TREX Coaches-IPBN Workshop / Mountain View, AR

FLN network leads, TREX coaches and IPBN leads will meet at this joint national

workshop.

November 13 new listing

Southern Blue Ridge Escarpment Landscape / TBD

Save the date for the next workshop of this FLN landscape.

FLN Prescribed Fire Training Exchanges (TREX)

September 10-24 San Juan Prescribed Fire Training Exchange / southwestern CO

This TREX is in progress.

Sept. 24-October 5 Yurok Prescribed Fire Training Exchange / Weitchpec, CA

The deadline for this TREX has passed.

Sept. 24-October 11 Cascadia Prescribed Fire Training Exchange / Cle Elum, WA

The deadline for this TREX has passed.

October 7-18 Klamath River Prescribed Fire Training Exchange / Orleans, CA

The deadline for this TREX has passed.

October 14-27 Intercambio y Entrenamiento en Quemas Prescritas en Español / Santa Fe, NM

The deadline for this TREX has passed.

November 1-21*

Cal-TREX Butte / Butte County, CA

deadline

This Cal-TREX will mobilize for one week within the three-week window. Details and a link to the application are in the <u>flyer</u>; applications are due by September 20.

Conferences, Workshops, Training, Etc.

October 1-3 5th Biennial Shortleaf Pine Conference / Van Buren, MO

Information: http://www.shortleafpine.net/shortleaf-pine-initiative/conferences

October 21

North Carolina Fire Management in Organic Soils / Holly Ridge, NC

new listing This workshop is co-hosted by the Southern Fire Exchange, North Carolina

Prescribed Fire Council and Southeast Regional Strategy Committee.

Information: https://www.eventbrite.com/e/fire-management-in-organic-soils-

workshop-tickets-69874986967

October 21-24 3rd Annual Cohesive Strategy Workshop / Plymouth, MA

Information: https://www.iawfonline.org/event/2019 cohesive strategy workshop/

November 18-22 Cultivating Pyrodiversity: The 8th International Fire Ecology and

Management Congress / Tucson, AZ Information: http://afefirecongress.org/

April 15-16, 2020

Colorado Wildland Fire Conference / Grand Junction, CO

new listing

Fire Adapted Colorado is presenting this conference focused on "Discover Your

Role: Reducing Wildland Fire Risk."

Information: https://www.wildfire-colorado.com/

April 20-24, 2020 new listing

3rd International Smoke Symposium / Raleigh, NC and Davis, CA

Presented by International Association of Wildland Fire in partnership with NWCG Smoke Committee and the UC-Davis Air Quality Research Center, the symposium

will have based in Raleigh, with a satellite location at UC-Davis.

Information: https://www.iawfonline.org/event/3rd-international-smoke-symposium/
