

LANDFIRE Post Card, November 2014

LANDFIRE Questionnaire is “Live”

As we mark the 10th anniversary of the start of the Program, LANDFIRE wants to know about your experience with LANDFIRE products and services. Please take about 20 minutes to [respond to this survey](#) and offer comments and recommendations in the spaces provided. Pass this link on to others as you see fit. You have until December 19 to tell us about your experience with LANDFIRE products and services and your thoughts on LANDFIRE's future.

Two webinars:

November 17: Customizing data - Curt Stripling, Geospatial Coordinator, Texas A&M Forest Service, and David Buckley, Principal Consultant, Technosylva, present [“Leveraging LANDFIRE for the Southern Wildfire Risk Assessment.”](#) They will show how the recent Southern Wildfire Risk Assessment Project leveraged and enhanced LANDFIRE data to provide a better reflection of Southern fuel and fire behavior conditions. [Register here.](#)

December 2: LANDFIRE and the Northwest Fire Science Consortium present a new study that TNC recently completed with the USFS Region 6 Ecology Program across portions of the PNW. TNC’s Mark Stern, Chris Zanger and Ryan Haugo will present the results of this work described in [A New Approach to Evaluate Forest Structure Restoration Needs Across Oregon and Washington](#), appearing in the January 2015 issue of *Forest Ecology and Management*. Information: <http://www.nwfirescience.org/>

Questions? Comments?
