Longitudinal Profile of the Yangtze River upstream

WE ARE RUNNING OUT OF TIME

FRESHWATER ECOSYSTEMS ARE COLLAPSING

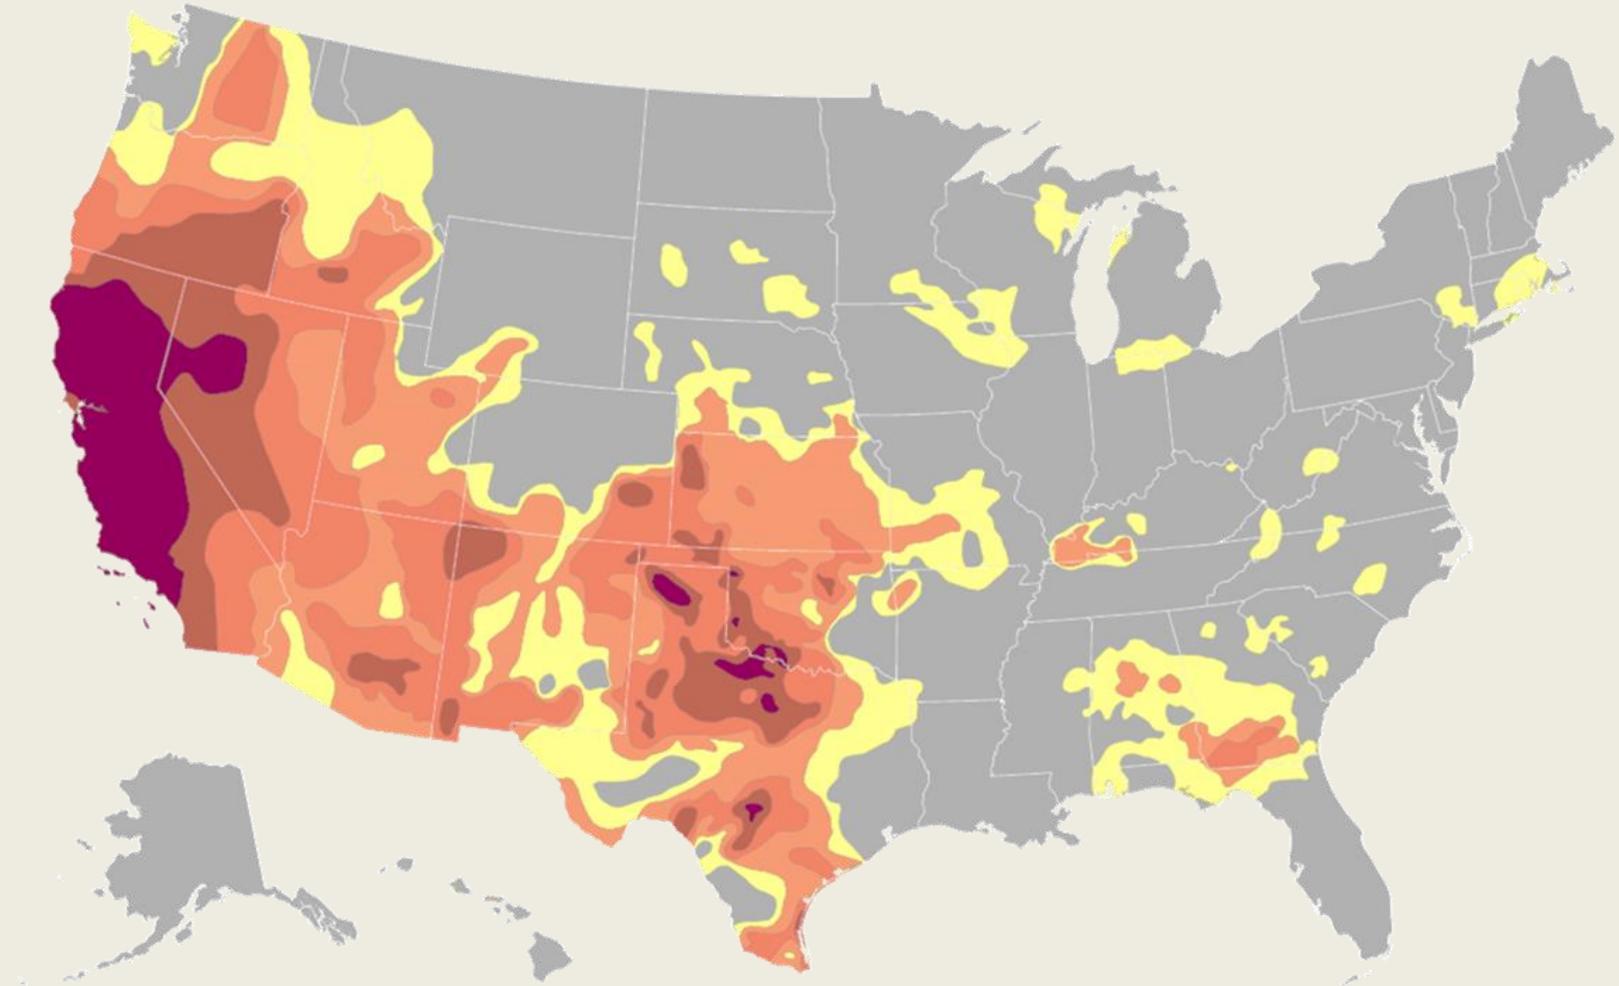

Source: WWF, Living Planet Index - D, 2014

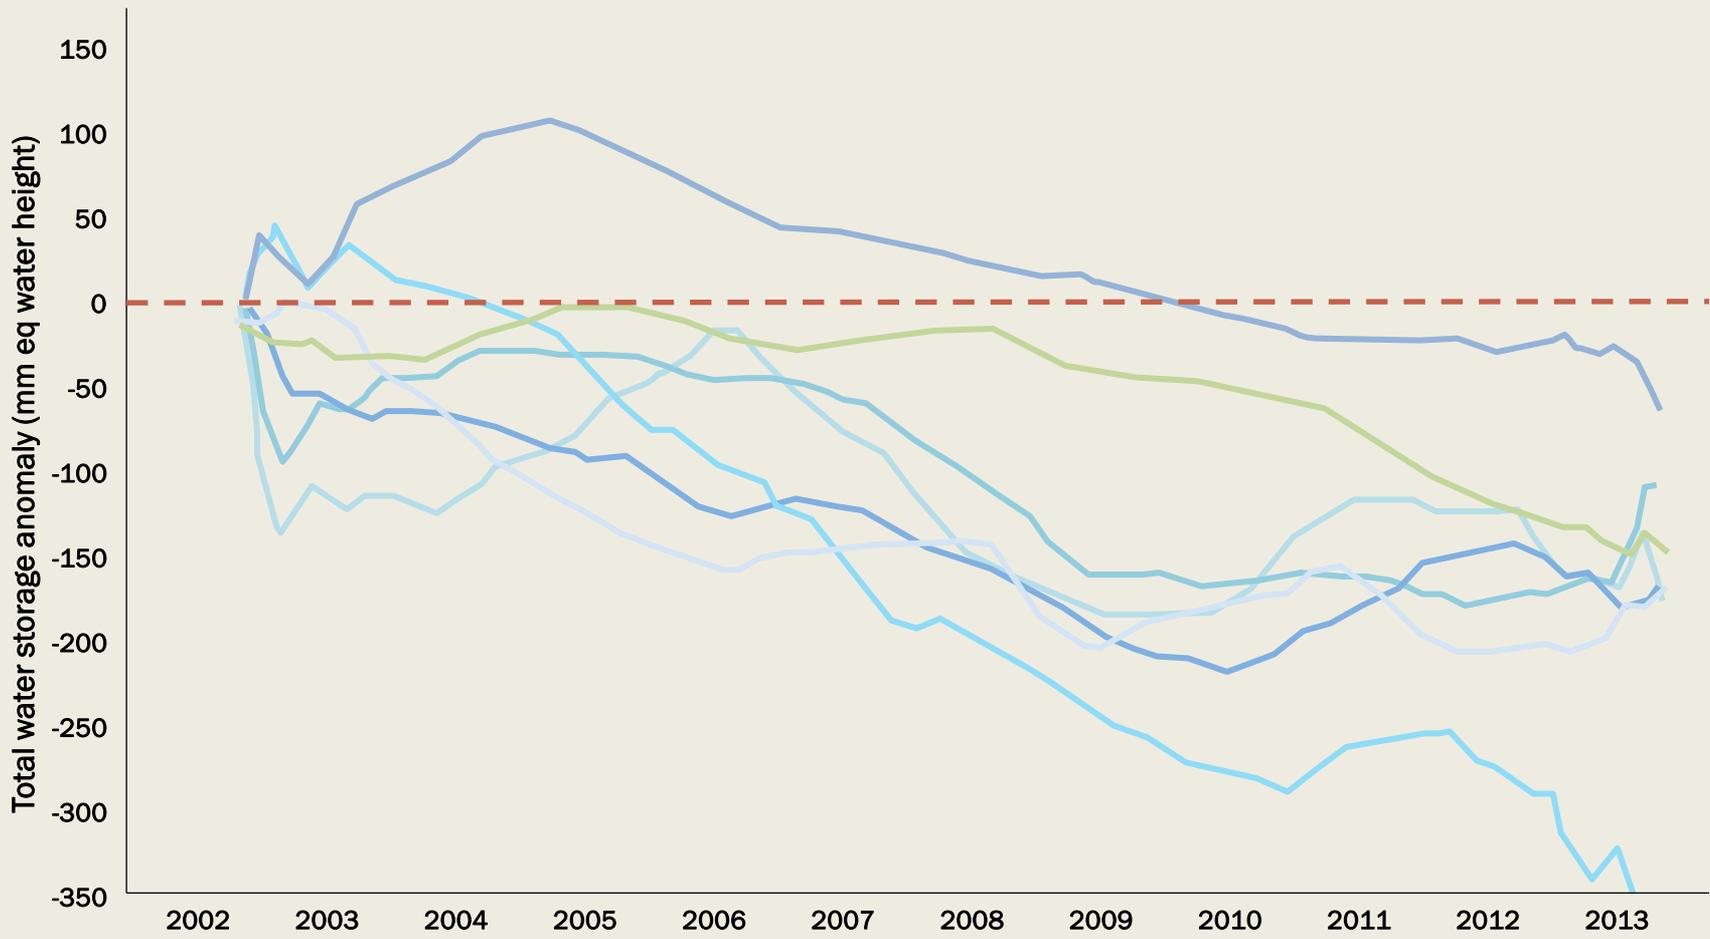

A photograph of a concrete bridge spanning a river. The bridge has several large, cylindrical concrete piers supporting it. The water in the river is dark and turbulent, with white foam from rapids visible. In the background, there are trees, some buildings, and a hillside under a clear sky. The text "Story from the Future: CHOICES" is overlaid in large, white, sans-serif font across the center of the image.

WATER CRISES ARE THE WORLD'S BIGGEST RISK

A grayscale topographic map of Earth, showing landmasses and ocean depths. The map is centered on the Atlantic Ocean, with North and South America on the left and Europe and Africa on the right. The terrain is rendered in shades of gray, with darker tones representing higher elevations and lighter tones representing lower elevations and ocean depths. A semi-transparent dark gray rectangular box is overlaid on the map, containing the text "A scarce resource...".

A scarce
resource...

THANK YOU
