

MAPPING OCEAN WEALTH

FISH PRODUCTION

Ocean habitats are crucial nurseries and breeding grounds for fish – driving commercial, recreational and subsistence fisheries.

Coastal communities, fishers and managers should protect and restore the habitats that support livelihoods, economies and food security.

Mapping Ocean Wealth demonstrates what the ocean does for us today so that we maximize what the ocean can do for us tomorrow.

MANGROVES
are fish factories for the
210,000,000
PEOPLE
who live near them and
depend on them
for food

THE \$190 BILLION
GLOBAL SEAFOOD INDUSTRY
depends on healthy
fish habitats

**PROTECTING
FISH HABITATS**
supports livelihoods,
economies and food security

Healthy and well-managed
CORAL REEFS
generate
5 to 10 TONS
of fish per square
kilometer per year

One hectare of
SEAGRASS
produces
\$24,000
more per year in commercially-important
fish than bare seafloor
