

LIVING SHORELINES

Evaluating the Triple Bottom Line

© JoeBay Aerials

Triple Bottom Line

Ecosystems

Ecosystem health is restored to benefit both humans and nature

Communities

Community risk is reduced and resilience to coastal hazards is enhanced

Economies

Economic benefits of floodplain, coastal and marine ecosystem services are documented and embraced

Proof of Concept

Ecosystem Services for the Environment

Ecosystem Services for Economies

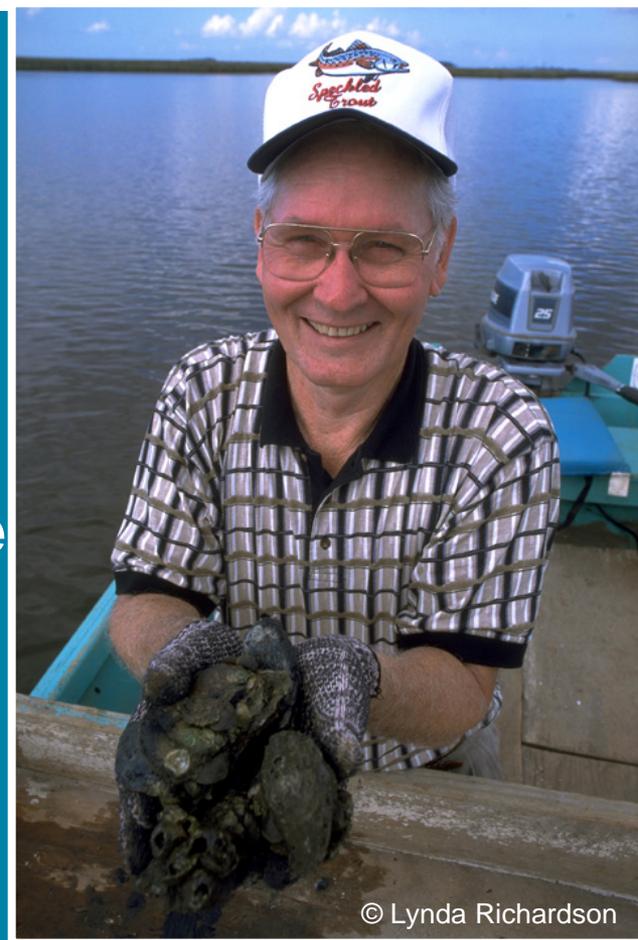

© Andrew Kornylak

Construction
10 miles/year

= 380 jobs

= \$29M revenue/sales

= ~\$10M household income

© Lynda Richardson

© Beth Maynor Young

Fisheries
fish / crabs / oysters

= ~\$8M revenue/sales

= >\$2M household income
