

## Tree Care Resources

*Regular tree care is vital for urban trees – both young and old! Below is a list of resources made by ... These resources cover everything from selecting a tree from a nursery to structural pruning, and more! The information found in the following resources is generally applicable across the United States. To find information specific to your location, consider local arboretums, extension offices, local tree non-profits, or arborists for information.*

### ISA – TreesareGood.org

Includes articles and documents on various aspects of tree care – from selecting a tree to buy, planting, caring for a tree, insect management, and more. Several have been translated into other languages.

### ISA Tree Owner Information Site:

<http://www.treesaregood.org/treeowner>

### En español:

<http://www.treesaregood.org/treeowner/spanish>

### In other languages:

<http://www.treesaregood.org/treeowner/translations>

### Arbor Day Foundation

Numerous articles on tree care, with many covering how to choose a new tree for a site. Includes interactive guides, videos on tree care, and more.

### Arbor Day Foundation Tree Planting and Care Site:

<https://www.arborday.org/trees/index-planting.cfm>.

### Morton Arboretum

Resources on tree care issues like watering, mulching, planting, and pruning. Also includes species selection advice applicable across much of Eastern U.S.

### Morton's Horticulture Care Site:

<https://www.arborday.org/trees/index-planting.cfm>.

## Importance of Tree Care

Trees in cities must overcome significant challenges for them to provide the many benefits they give. Regular tree care, done properly, can extend trees' lifetimes and increase their ability to improve our cities' livability through temperature moderation, stormwater capture, energy savings, and more.

The mobile app is available for free at the Apple App Store and on Google Play.
