# How to Use the HTHC App
Home Page

Through the HTHC Mobile App, you can record inventory data about a tree, perform checks on your tree's health, and record stewardship you do for your tree.

The **Home Page** is shown at right.

1. Tap here to access the **Main Menu**

2. Tap record **Tree Care** activities, like mulching, pruning, or watering, for your tree.

3. Tap here to do a **Health Check** for your tree.

4. Tap here to do a **Pest Check** for your tree.

5. Tap here to **Add a Tree**'s inventory information to HTHC's database.

6. Tap here to find an ISA-Certified arborist near you.
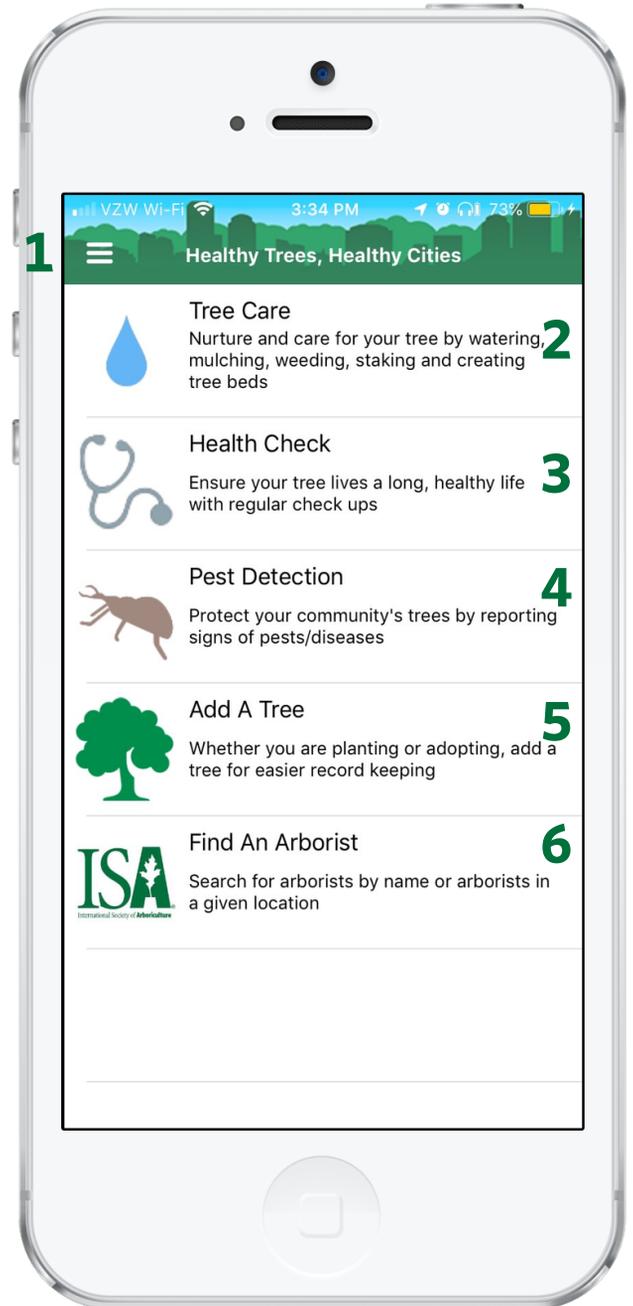

1

2 Tree Care
Nurture and care for your tree by watering, mulching, weeding, staking and creating tree beds

3 Health Check
Ensure your tree lives a long, healthy life with regular check ups

4 Pest Detection
Protect your community's trees by reporting signs of pests/diseases

5 Add A Tree
Whether you are planting or adopting, add a tree for easier record keeping

6 Find An Arborist
Search for arborists by name or arborists in a given location

How to Use the HTHC App
Main Menu

The **Main Menu** is shown at right.

1. Tap here to access the **Home Page**

2. Tap here to view a list of your user's **My Trees** – trees that you have checked or added previously, or trees assigned to you in a Project on the HTHC Dashboard

3. Tap here to view the Activity Log

4. Tap here to view photos you have taken of trees using the app

5. Tap here to view Resources like pest presentations, videos on tree care, and more

6. Tap here to view your user's My Trees in a Map view

7. Tap here to view and change settings, including signing in/out of the app

8. Tap here to view what version of the app you have installed
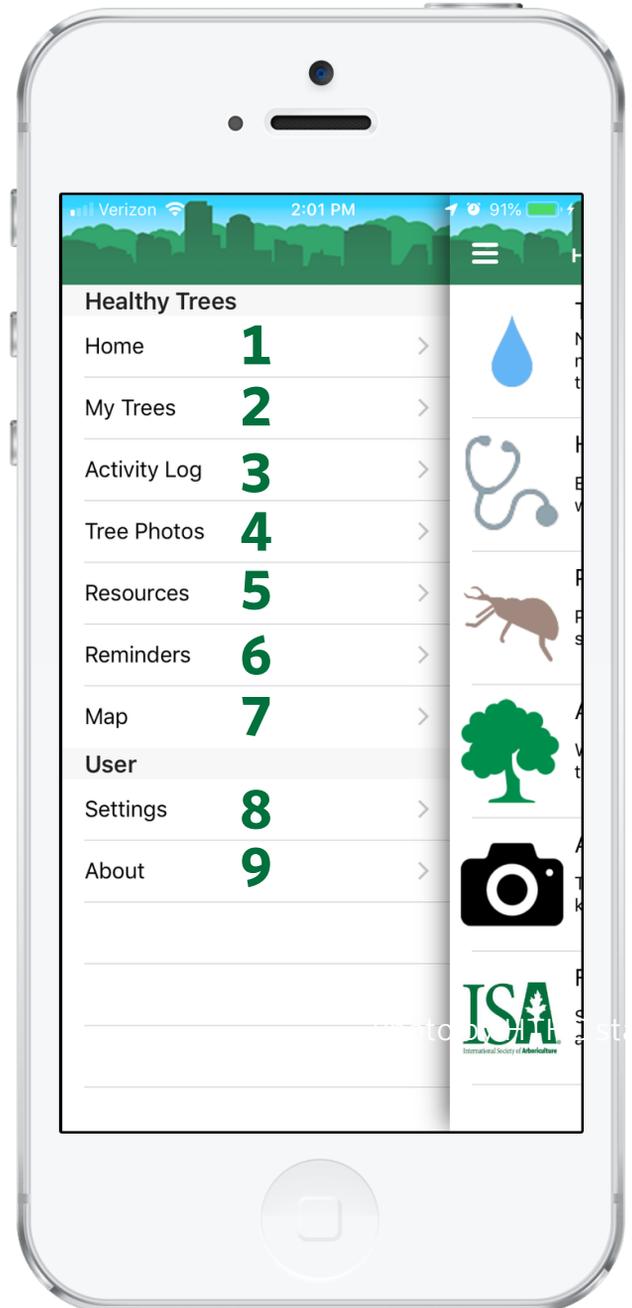

The mobile app is available for free at the Apple App Store and on Google Play.

How to Use the HTHC App
Recording an Activity

The HTHC allows you to record different **activities** on a tree.
If a tree isn't in HTHC's database, follow these steps:

From the **Home Page**, tap on the **Activity** you want to perform
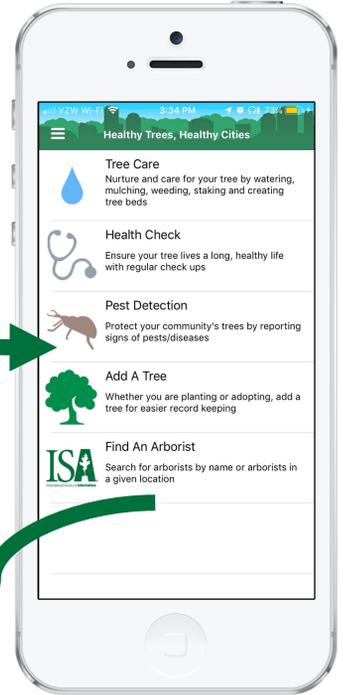

Fill out the **Tree Data Form**, including:
- Species
- Name or ID number
- Location (use pencil shaped button to accurately map it)
- DBH
- Any notes you may want to include

Hit **Next** when you're done.
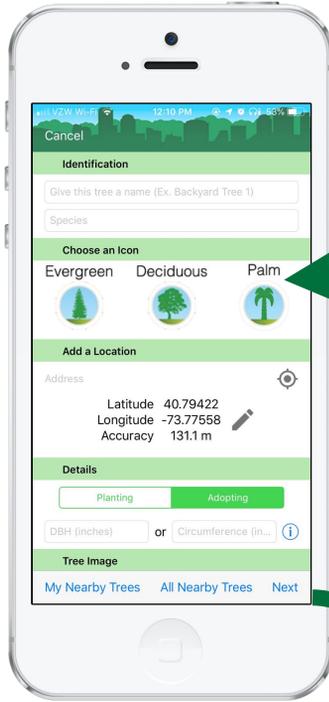

Fill out the **Activity's Form** (Pest Check shown) completely.

When done, hit **Save!**
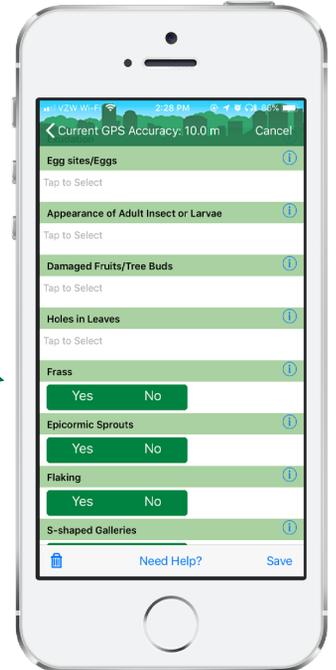

The mobile app is available for free at the Apple App Store and on Google Play.

How to Use the HTHC App
Finding your My Trees list or Map

Your My Trees list contains trees that you have performed activities on **or** trees assigned to your username in a project. Find them in the app by following these steps:

From the **Home Page**, tap on the Main Menu button at top left

At the Main Menu, tap on **My Trees** to view a list of trees.

Tap on **Map** to view the trees in a map form.

By tapping on a tree from either the list view or the map, you can open the tree info page.
Tap on the **+** button on the bottom right to add a new activity, like a health check!

The mobile app is available for free at the Apple App Store and on Google Play.
