

# The LANDFIRE Program: Responding to Feedback and User Needs

Initial information for policy makers while LANDFIRE was being produced

Regional Analysis

Original baseline LANDFIRE products

Planning

Corrected known issues at international boundaries, and improved vegetation and fuels information in areas classified as agriculture, urban, rock and water

Ecological System	Current Departure	Departure after 20 Years with No Mgmt	Departure after 20 Years with Ecological Mgmt
Aspen	37	49	33
Basin Wildrye	73	79	45
Low Sagebrush	41	42	39
Montane Sagebrush Steppe	67	73	57
Riparian	21	32	27
Wet Meadow	33	49	19

Version	0.5.0	1.0.0	1.0.1	1.0.2	1.0.5	1.1.0
Data Circa	2000	2000	2000	2000	2000	2008
Phase	Rapid Assess.	National	Rapid Refresh	Improve ments	Refresh 2001	Refresh 2008
Extent	Lower 48	All states	Western States	Lower 48	All states	All states

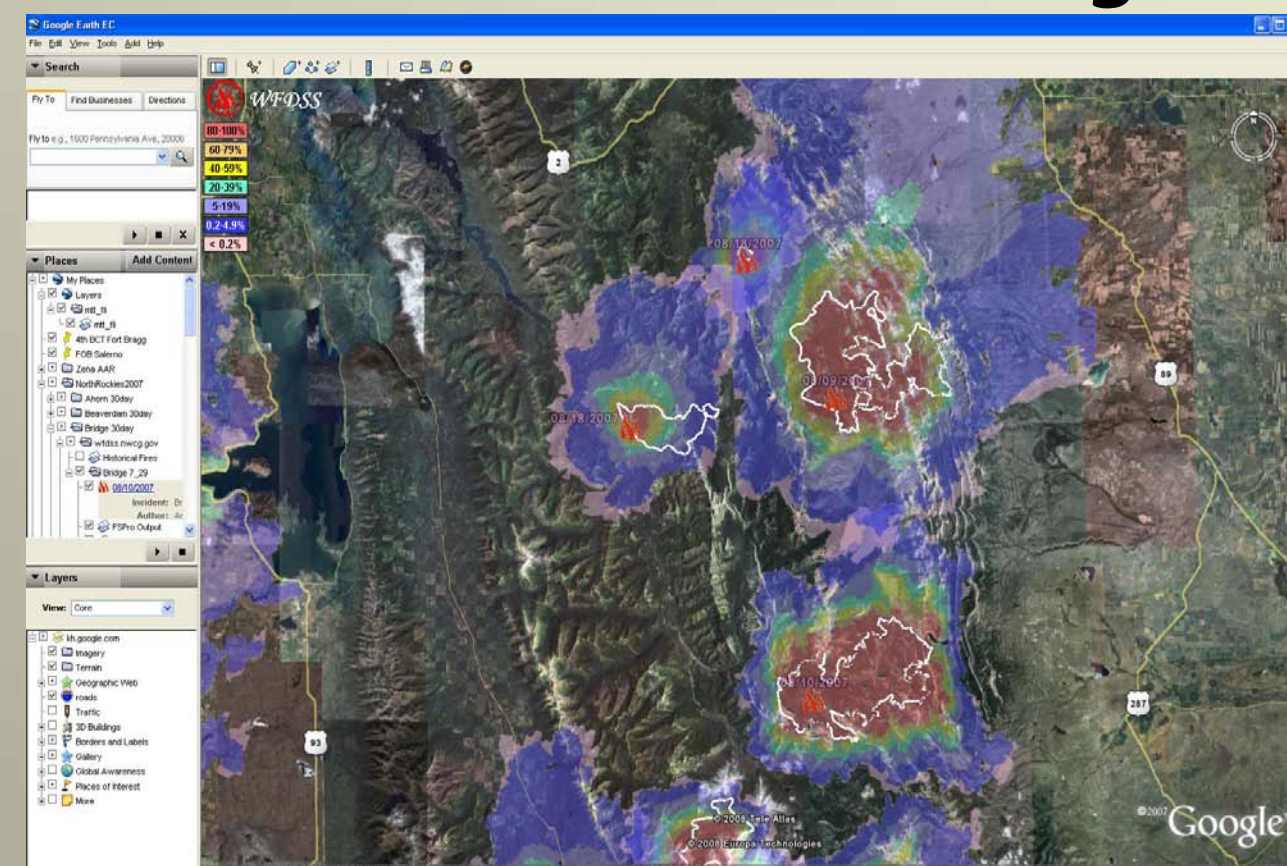

Forecasting

Fuels related layers adjusted for known large western wildfires

Wildland Fire Planning

Beginning with the improved spatial products, refined the vegetation type, vegetation cover and vegetation height spatial products

Wildlife

Resource Management

Updated vegetation and fuels layers from 1.0.5 to 2008
